

springcompany is looking for web developers

Would you like to develop innovative websites that create business value for our customers and raise the bar for what is technically possible?

-Then you might be just the student assistant, we need!

We are looking for:

We are looking for one or more technically savvy people who have flair and experience in web development. Your tasks will be to develop the technical parts of the web solutions we provide to our customers.

Tasks:

- HTML production, including work with javascript libraries (jQuery, CSS3, HTML 5).
- Technologies: ASP.NET, C #, XML / XSLT, Webservices.
- SQL databases, programming with T-SQL.

The Web media is constantly evolving, so your desire to learn about and use new technologies is important. If client contact comes naturally to you it is an advantage but not a requirement.

Your background and personality:

You are probably a university grad student and have taken technical and communicative courses. If you have experience from previous Web projects; that'll be school assignments as well as own projects, we would love to hear about it.

We appreciate the following characteristics:

- Knowledge of CMS platforms. Umbraco or Sitecore CMS preferred.
- You are open-minded, committed and diligent.
- Responsible and able to work independently.
- Good at focusing, especially when there are multiple tasks at once.

In Spring Company, we are often very busy, so your ability to deliver in a reasonable time is definitely a plus.

Working hours and wages:

Working hours are expected to be approximately 15 hours per week, but may vary depending on holidays and exam periods. The salary will depend on qualifications and experience level. A complete working station will be available in order for you to perform your duties at Spring Company.

Interested?

Send us a written request by e-mail: info@springcompany.dk.

The positions are to be occupied as soon as possible, so please do not hesitate to send your application. If you're interested in learning more about the position, please contact project manager Chres Jensen on +45 60 62 9977.
